ROCOR STUD ADHESIVE

Description

Rocor® Stud Adhesive™ is a quality stud adhesive specially formulated in accordance with AS2753 - 1985 for bonding of plasterboard to metal internal framing or internal wooden studs (including some treated timbers i.e. H2 – LOSP, and H2F – envelope, treated timbers).

Uses

- Bonding plasterboard to timber or metal building framing
- Suitable for pine softwood framing
- Suitable for Hardwood framing

Compatible Substrates

Surface Preparation

All surfaces must be clean, sound and free of dust, oil or contamination. Ensure that substrate temperature is above 5 °C. If bonding a non-porous surface, such as metal, ensure that the other surface is capable of absorbing moisture (porous).

Application

Fix plasterboard as per AS2589-1983, following fixing instructions provided by the plasterboard manufacturer, including back blocking of ceilings, and temporary fixings where appropriate. In demanding conditions (e.g. garage ceilings) and in harsh climates (high humidity, temperature) adopt fixing methods designed to accommodate higher stress requirements.

Applying Rocor® Stud Adhesive™ stud adhesive to studs to form walnuts approximately 25mm diameter and 12mm high, ensuring adhesive is applied at least 200mm from screw or nail fasteners. Plasterboard must be fixed within 30 minutes of adhesive application and before skinning occurs. Skinning is accelerated in hot, windy, dry conditions.

Cure Time

Rocor® Stud Adhesive™ will reach 80% of its strength in approximately 24 hours. Full cure is normally achieved in 5 to 7 days, depending on walnut size, conditions and substrates.

Clean Up

Clean up uncured adhesive with water. Cured material can be removed by trimming with a knife or scraper.

Our Focus is Clear. Perfecting Adhesives.

IMPORTANT: Information, specifications, procedures and recommendations provided (“information”) are based on our experience and we believe this to be accurate. No representation, guarantee or warranty is made as to the accuracy or completeness of the information or that use of the product will avoid losses or damages or give desired results. It is purchaser’s sole responsibility to test and determine the suitability of any product for the intended use. Tests should be repeated if materials or conditions change in any way. No employee, distributor or agent has any right to change these facts and offer a guarantee of performance.

NOTE TO USER: by ordering/receiving product you accept the H.B. Fuller General Terms and Conditions of Sale applicable in the region. Please request a copy if you have not received these.

These Terms and Conditions contain disclaimers of implied warranties (including but not limited to disclaiming warranties of fitness for a particular purpose) and limits of liability. All other terms are rejected.

In any event, the total aggregate liability of H.B. Fuller for any claim or series of related claims however arising, in contract, tort (including negligence), breach of statutory duty, misrepresentation, strict liability or otherwise, is limited to replacement of affected products or refund of the purchase price for affected products. H.B. Fuller shall not be liable for loss of profit, loss of margin, loss of contract, loss of business, loss of goodwill or any indirect or consequential losses arising out of or in connection with product supply.

Nothing in any term shall operate to exclude or limit H.B. Fuller’s liability for fraud, gross negligence or for death or personal injury caused by negligence or for breach of any mandatory implied terms.
Limitations

- Not recommended for use with painted metal battens.
- Only suitable for H2F oil treated timber providing minimum 14 days airing to application and 1/3rd fixing to be used on ceiling
- Not recommended for bonding to coated metal e.g. colourbond
- Not recommended for timbers treated for external use (H3 level and above).
- Only recommended for treated timber that is dry. When fixing plasterboard ensure the timber is dry to the touch. If there is evidence of grease or oiliness on the timber surface do not apply adhesive, and rather mechanically fasten the plasterboard.
- Contact the timber supplier so they can investigate and determine why the timber is not dry.

Safety Information

Rocor® Stud Adhesive™ is not classified as hazardous according to criteria of Worksafe Australia.
A Material Safety Data Sheet is available from the H.B. Fuller representative your state, HB Fuller Australia customer service, or downloadable from the HB Fuller web site, www.hbfuller.com.au.

Disclaimer

This technical data sheet summarises at the date of issue to the best technical knowledge of HB Fuller Australia.
