H.B. Fuller offer a comprehensive range of durable adhesives, proven to work on Australian building sites just as hard as you do. Whether you’re bonding flooring, panels, insulation or plasterboard, there’s a quality H.B. Fuller adhesive that will help you get the job done.
Max Bond™ Original Construction Adhesive

Max Bond™ Original Construction Adhesive is a high strength, rigid, synthetic rubber based adhesive designed primarily for the installation of wood sub-flooring, architraves and wall panels. Max Bond™ Original Construction Adhesive is also ideal for bonding many common construction materials such as metal, timber and concrete.

**Key Benefits**
- Bridges small gaps, effective when used on uneven surfaces
- Multi purpose
- Repositionable for up to 20 minutes after application
- Water resistant
- High bond strength and heat resistance

**Uses**
- Installing particle board, fibre cement, plasterboard, plywood and strip flooring to joists
- Bonding cement sheet and plaster board to timber or metal studs and joists
- Skirting boards, architraves and trims to walls
- Installing timber wall panelling to timber and metal studs and joists

### Specifications
- **Cured State**: Rigid - Minimal flexibility
- **Skin Time**: 2 - 5 mins
- **Cure Time**: Variable dependent on conditions
- **Area**: Interior/exterior
- **Product Chemistry**: Solvent based rubber

Max Bond™ Fast Grip
Water Based Construction Adhesive

Max Bond™ Fast Grip is a water based, premium grade, multi purpose construction adhesive that is easy to use and provides a strong initial grab. Max Bond™ Fast Grip reduces squeaks in the flooring system and cures to give high bond strength. Max Bond™ Fast Grip is ideal for bonding parquetry to floors and subfloors and for bonding solid timber strip flooring that will be sanded and finished after installation.

Key Benefits

- Water based, high bond strength and heat resistance when cured
- Versatile
- Fast initial grab
- Low VOC
- Low odour
- Meets AS 2329, bridges gaps up to 5mm
- Non-flammable and solvent free
- Reduces squeaks in floors

Uses

- Bonding panelling to framing e.g. cement sheet, plywood, plasterboard
- Bonding subfloors to timber joists e.g. particleboard, plywood
- Bonding strip flooring and parquetry to subfloor and concrete slabs

Max Bond™ Panel Grip Construction Adhesive

Max Bond™ Panel Grip Adhesive is a high strength, fast grab, neoprene rubber-based construction adhesive with exceptional wet grab strength, as well as exhibiting high initial bond strength when used in contact bonding method. It is ideally suited to bonding general construction materials including timber, plasterboard, concrete and metals where aggressive “tack” is required.

**Key Benefits**

- No run or drip of adhesive – even in overhead applications
- Exceptional wet-grab strength
- Suitable for a wide range of general purpose construction materials
- High bond strength
- Suitable for interior/exterior use
- Suitable for use with damp timber

**Uses**

- Ideal for vertical and overhead applications where instant grab and a strong bond is required
- Installing panelling and fixtures in office or shopfitting applications
- Bonding skirting boards and architraves in building construction
- General building and construction applications, including those with difficult to bond substrates that require fast grab and a strong bond

### Specifications

- **Cured State**: Rigid - Minimal flexibility
- **Skin Time**: 1 - 5 mins
- **Cure Time**: Variable dependent on conditions
- **Area**: Interior/exterior
- **Product Chemistry**: Solvent based rubber

- Aluminium
- Plasterboard
- Timber
- Particleboard
- Many plastics (pre-test)

Refer to TDS for additional technical information.
Max Bond™ Rapid Cure
Polyurethane Construction Adhesive

Max Bond™ Rapid Cure is a rigid/hard set polyurethane adhesive for use where strong, stress resistant bonding is required. Waterproof to D4 classification makes it suitable for exterior and marine applications. Max Bond™ Rapid Cure needs only one hour clamping time in most conditions.

### Key Benefits
- Rapid cure – one hour clamping time
- Water resistance – interior and exterior (D4 class)
- Bonds to most substrates
- Will not allow joints to move or flex
- Foams slightly if not clamped, bond strength significantly improves when clamped

### Uses
- Joinery and cabinet making where rigid bonding is required
- Pergola and decking construction
- Bonding carpet grip strips to floors and subfloors – especially to concrete when unable to nail
- Bonding where fast cure is required
- Green star building suitable (solvent free)
- Outdoor furniture construction
- Laminating timber beams

### Specifications
- **Cured State**: Rigid
- **Skin Time**: 20 mins
- **Cure Time**: 1 hour clamping time, ultimate bond strength in 24 hours at 23°C, 50% RH
- **Area**: Interior/exterior
- **Product Chemistry**: Polyurethane

Max Bond™ Pro Gun Construction Adhesive

Max Bond™ Pro Gun Adhesive is a ready-to-use polyurethane foam adhesive designed for bonding timber subfloors to timber joists. As the adhesive foam is applied with a gun applicator, the rate of application can be controlled and the canister can be sealed and re-used over a period of weeks.

**Key Benefits**
- High yield/equivalent to 30x 300g cartridges of construction adhesive
- Superior bonding strength
- Long open time
- Reduced waste
- Can be sealed and re-used
- Suited to wet, dry or green timber

**Uses**
- Bonding of subfloor to timber joists
- Bonding of panelling to timber studs
- Refer to page 57 for application gun

FulaPrene™ 303 Adhesive & Sealant

FulaPrene™ 303 is a neoprene based adhesive sealant ideal for use in sealing lap joints in sheet metalwork or applications where a watertight bond-line is required. FulaPrene™ 303 will adhere to a wide range of substrates including many difficult plastics and rubbers, and can be used in numerous common construction applications.

**Key Benefits**
- Seals water and airtight
- Paintable
- Interior/exterior
- Resistant to salt and chlorinated water
- Heat resistant to 80°C
- UV resistant
- Strong adhesion to a wide range of substrates

**Uses**
- Sealing lap joints in box guttering
- Sealing air conditioning ducts
- Adhesive for fixing wall panels to studs, floor boards to joists
- Re-fixing loose ceramic tiles around pools and in showers
- Sealing roof flashings

**Specifications**
- **Cured State**: Rigid - Minimal flexibility
- **Skin Time**: 2 - 5 mins
- **Cure Time**: Variable dependent on conditions
- **Area**: Interior/exterior
- **Product Chemistry**: Solvent based rubber

- Aluminium
- Timber
- Plywood
- Plasterboard
- Some plastics and rubber

Refer to TDS for additional technical information.
Max Bond™ PVA Adhesive

Max Bond™ PVA is a professional quality, cross linking water resistant adhesive that resists soaking into end grain. The cross linking formulation assists in creating a stronger, water and heat resistant bond and reduces the chance of substrates separating over time under stress.

### Key Benefits
- Cross linking
- Fast setting – dries clear
- D3 standard water resistance
- Sandable
- High solids – high strength
- Water clean up

### Uses
- Joinery, cabinet and furniture making
- Laminating and veneering
- Flooring
- Craft work

### Specifications
- **Cured State**: Slightly flexible
- **Skin Time**: 15 mins (22°C, 60% RH)
- **Cure Time**: Full cure in 24 hours
- **Area**: Interior/exterior
- **Product Chemistry**: PVA

**ROCOR® Trade Stud Adhesive**

ROCOR® Trade Stud Adhesive is a quality stud adhesive that meets the requirements of AS2753 for bonding plasterboard to metal internal framing or internal wooden studs.

**Key Benefits**
- Complies with AS2753: adhesives - mastic - for bonding gypsum plaster lining to wood and metal framing members

**Uses**
- Bonding plasterboard to timber or metal building framing
- Suitable for pine softwood framing
- Suitable for hardwood framing
- Suitable for timber framing (H1, H2, H2F)

**Fuller Trade™ Plasterboard Stud Adhesive**

Fuller Trade™ Stud Adhesive is a premium grade adhesive that exceeds the requirements for Australian Standard: AS2753. It provides a superior bond for plasterboard to metal and all types of timber framing.

### Key Benefits

- Exceeds AS2753: adhesives - mastic - for bonding gypsum plaster lining to wood and metal framing members
- Superior slump and sag resistance

### Uses

- Bonding plasterboard to timber or metal building framing
- Suitable for pine softwood framing
- Suitable for hardwood framing
- Suitable for timber framing (H1, H2, H2F)

### Specifications

- **Cured State**: Rigid - Slightly flexible
- **Skin Time**: 30 mins
- **Cure Time**: Variable dependent on conditions

Spray Grip™ Contact Adhesive

Spray Grip™ is a general purpose contact adhesive that bonds to a wide variety of substrates. Spray Grip™ offers high initial bond strength for instant results and is suitable for fast bonding applications without the need for clamping.

Key Benefits
- Fast tack, high initial bond strength
- Industrial grade formulation
- General purpose – bonds many substrates
- Flexible bond line
- Low odour
- Low VOC (80g/L)

Uses
- Adhering breathable building insulation wrap
- Bonding metal edge bead to plasterboard
- Laminating foam, fabric, and coverings to metal and timber
- Bonding fibre reinforced laminate to plasterboard
- Bonding and laminating involving MDF
- Repairing laminates and edge banding

Specifications
- Cured State: Thin film
- Tack Free Time: 3 - 5 mins (23°C, 50% RH)
- Cure Time: 90% of final bond strength in 24hrs (23°C, 50% RH)
- Area: Interior
- Product Chemistry: Solvent based synthetic rubber
- Refer to TDS for additional technical information.

Compatible Substrates
- Metals
- MDF & Plywood
- Plasterboard
- Acrylic
- Synthetic leather
- Fibre reinforced laminates
- Polyurethane foam
- Paper/Cardboard
- Many plastics (Pre-test)
- Fabric (Pre-test)
- Rubber (Pre-test)

Note: Not suitable for polystyrene.

Available Products
- Spray Grip™ Contact Adhesive 500ml Can
  - Resource Code: 4172554084
  - Colour: Translucent
  - Ctn Qty: 12

Rapid Grip™ Liquid Contact Adhesive

Rapid Grip™ Liquid Contact Adhesive is a low viscosity, general purpose adhesive. It creates a fast strong bond with most substrates making it perfect for applying laminates.

Key Benefits
- Spreads easily and uniformly
- Strong bond
- Fast bonding action
- Heat and water resistant
- Can be applied using brush spreader or roller

Uses
- Bonding melamine to particleboard, plywood, MDF board and masonite
- Laminating a variety of materials
- General repairs

Specifications
- Cured State: Flexible
- Typical Film Thickness: 1mm
- Skin Time: 10 - 30 mins
- Cure Time: 24 hours
- Area: Interior/exterior
- Product Chemistry: Solvent based rubber
- Refer to TDS for additional technical information.

Compatible Substrates
- Fabric
- Metal
- Glass
- Plasterboard
- Linoleum
- Melamine board
- Timber inc. MDF
- Masonite
- Particleboard
- Polyurethane foam
- Cork

High quality multi-functional construction joint sealants that are easy to apply and compatible with a variety of construction substrates. Strong and flexible where necessary. Suitable for high traffic situations and major public works installations.
Firesound™ Fire Rated Acoustic Sealant

Firesound™ is a premium quality, flexible construction sealant formulated to perform as a barrier to the passage of both fire and sound through construction joints and service penetrations in concrete, aerated concrete, block work, brickwork and fire-rated plasterboard.

**Key Benefits**
- Premium quality, flexible construction sealant accommodating up to ±20% joint movement
- Fire rated for up to 4 hrs in joints up to 50 mm when tested in accordance with AS1530.4
- Intumescent; expands to compensate for deflection of building elements that result from exposure to extreme heat or fire
- Non-hazardous, free from solvents, isocyanates and asbestos
- Excellent acoustic performance; low shore A hardness and high density formula achieving up to Rw 65 (-2; -5) when tested in accordance with AS1276.1
- Low VOC Green star project compliant sealant, 31g/L (SCAQMR Rule 1168.)
- Paintable
- UV Stable

**Uses**
- Sealing exterior and interior construction joints that are subject to movement (up to ±20%) in pre-cast concrete panels, block work, brickwork, aerated concrete and fire-rated plasterboard
- Gaps around cables, metal pipes, conduits, busways and ducts that penetrate walls, floors and ceilings

Refer to page 58 for Recommended Joint Configurations

Check certification requirements or consult a fire engineer before use in a fire rated application

- Cable coverings (PVC)
FulaCaulk™ FR
Fire Rated Acrylic Sealant

FulaCaulk™ FR is a one part, water-based construction sealant for sealing joints in applications where a fire resistance rating is required. It has been tested in accordance with AS1530.4-2014.

Key Benefits

- Fire rating for gaps up to 40mm
- Up to 4 hour fire rating (AS1530.4)
- Good flexibility; ±15% joint movement capability
- For interior use
- Paintable
- Can be applied to damp surfaces
- Intumescent; expands when exposed to fire or extreme heat

Uses

- Sealing interior construction joints that are subject to movement (up to ±15%) in concrete panels, block work, brickwork and fire-rated plasterboard
- If joint movement is not required, can be used as a putty for filling holes in fire rated substrates

FulaFlex™ 550LM Low Modulus Polyurethane Joint Sealant

FulaFlex™ 550LM is a one-component moisture-curing low modulus Class A polyurethane sealant with excellent joint movement capabilities. It cures to form a flexible, durable and weather proof sealant and exhibits excellent adhesion to a wide range of common construction substrates.

FulaFlex™ 550LM satisfies the requirements for the Green Building Council of Australia (GBCA).

**Key Benefits**

- Low modulus, Class A joint sealant
- Excellent flexibility (tested to ±35% ISO 9047)
- High performance - Excellent adhesion to many surfaces
- Good UV and weather resistance - can be used internally or externally
- Paintable
- Fast skin formation and cure rate compared to traditional low-modulus polyurethane sealants
- ASTM C920 Type S, Grade NS, Class 25 certified
- ISO 11600/F/25LM certified

**Uses**

- Building joints with high movement
- Joints in pre-cast and tilt-up concrete elements
- Expansion joints in fibre cement facades
- Connection joints between windows, door frames and walls
- Joints in brickwork, masonry and blockwork
- Perimeter fillets in waterproofing membrane systems

**Specifications**

- **Cured State**: Elastomeric - highly flexible
- **Joint Width**: 6 - 30mm
- **Movement Capability**: ±35%
- **Skin Time**: 40 mins (23°C, 50% RH)
- **Cure Time**: 3 - 4mm/day (23°C, 50% RH)
- **Hardness**: Shore A, ca. 30
- **VOC**: 58g/L
- **Area**: Interior/exterior

**Available Products**

- **FulaFlex™ 550LM PU Sealant 310ml Cartridge**
  - Colour: white, grey, black
  - Ctn Qty: 12

- **FulaFlex™ 550LM PU Sealant 600ml Sausage**
  - Colour: white, grey, black
  - Ctn Qty: 20

**Compatible Substrates**

- Concrete
- Fibre cement sheeting
- Ceramic
- Masonry
- Brick
- Plasterboard
- Metal
- Steel inc. stainless
- Zinc/galvanised steel
- Aluminium (uncoated)*
- Timber

* pre-test powder coated aluminium surfaces due to the wide range of available coatings

Refer to TDS for additional technical information.
FulaFlex™ 570FC Fast Cure Polyurethane Sealant & Adhesive

FulaFlex™ 570FC is a one-component moisture-curing fast-cure polyurethane adhesive/sealant developed for application to concrete, masonry and many construction related substrates. It has fast skin formation and curing properties, curing to form a strong, durable and weather resistant adhesive/sealant exhibiting excellent adhesion to a wide range of substrates.

FulaFlex™ 570FC is low in VOC and satisfies the requirements for the Green Building Council of Australia (GBCA).

**Key Benefits**
- Excellent adhesion to many substrates
- Bonding and sealing in one
- Excellent resistance to ageing/weathering – suitable for interior and exterior use
- Permanently elastic; ±25% joint movement capability
- Paintable
- Pick resistant sealant for use in public areas, shops, schools, prisons, etc
- Low VOC – ca. 58g/L
- No shrinkage
- Non-sag
- Excellent vibration and dampening properties
- ISO 11600/F/25HM certified

**Uses**
- Sealing trafficable floor joints in concrete floors
- Bonding and sealing fibre-cement panels
- Sealing pipe and duct penetrations in walls and floors
- Joints around windows, door frames and walls
- Lap joints secured with fasteners

FulaFlex™ 625 Hybrid Polymer Sealant

FulaFlex™ 625 is a high performance, solvent free, moisture curing hybrid polymer construction sealant that provides a non-hazardous alternative to traditional polyurethane construction sealants. It cures to form a seal that is tough, elastic and weatherproof with good chemical resistance. FulaFlex™ 625 is a low modulus product ideal for sealing joints where high joint movement is anticipated.

Key Benefits
- Isocyanate and solvent free
- Permanently flexible; ±25% joint movement capability (ISO 11600 Type F, Class 25, Subclass LM)
- UV and weather resistant - will not yellow (tested to 3000hrs QUV-B according to ISO 4892-3, CYCLE 2)
- Excellent long term resistance to seawater, caustic solutions and cleaning agents
- Strong adhesion to a wide range of substrates without priming
- Exhibits no shrinkage or bubble formation during curing
- Does not sag or slump in joints up to 35mm
- Zero VOC
- Paintable

FulaFlex™ 650FC Fast Cure MS Hybrid Polymer Sealant & Adhesive

FulaFlex™ 650FC is a high performance, solvent free, moisture curing hybrid polymer construction and industrial adhesive/sealant that provides a non-hazardous alternative to traditional polyurethane adhesive/sealants. It cures to form a seal that is tough, elastic and weatherproof with good chemical resistance. FulaFlex™ 650FC is a high modulus product ideal in bonding applications where differential expansion and contraction are anticipated.

Silicones & Specialty Sealants

H.B. Fuller produces a range of premium quality silicone sealants suitable for professional applications. Applications range from high temperature bonding and sealing, to roofing and cladding, glazing, wet area joint sealing, concrete form sealing and potable water tank construction. Choosing the right silicone sealant will help you get the job done.
FulaSeal PRO™ 300
Premium Grade Industrial Silicone

FulaSeal PRO™ 300 is a premium grade, neutral cure, 100% silicone sealant specially formulated for use in glazing, construction and industrial fabrication where a premium quality, non-corrosive sealant is required. FulaSeal PRO™ 300 combines a high level of resistance to temperature, weathering, and UV exposure with excellent adhesion, flexibility and durability. FulaSeal PRO™ 300 can also be used as an adhesive where a highly flexible, waterproof, high temperature resistant bond line is required.

Key Benefits
- Fast skinning
- ±30% Joint movement capability
- Low sag
- Low shrinkage
- Neutral cure
- UV and weather resistant
- Low VOC
- AS4020-2005 approved

Uses
- Sealing glass block structures, laminated glass, roofing and wall cladding, gutters, flashings, tanks and silos
- Sealing glass partition joints
- Glazing and waterproofing of skylights
- Non structural weather sealing of curtain wall facades
- Sealing and insulating of electrical services
- Filling channels and sealing lap joints in metal fabrication
- Suitable for bonding standard silver-backed mirrors

Specifications

- **Movement Capability**: ±30%
- **Skin Time**: 10 - 15 mins (23°C, 50% RH)
- **Cure Time**: 2mm/day (23°C, 50% RH)
- **Hardness**: Shore A, ca. 30
- **VOC**: <30g/L
- **Area**: Interior/exterior
- **Potable Water Approved**: Yes
- **Product Chemistry**: Neutral cure silicone

FulaSeal PRO™ 660
High Performance Silicone Sealant

FulaSeal PRO™ 660 is a high performance, neutral cure, 100% silicone adhesive/sealant designed for use in a wide range of industrial, glazing, cladding, automotive and assembly applications. FulaSeal PRO™ 660 cures to form a highly flexible silicone rubber with high tensile strength properties and exhibits superior adhesion to a wide range of surfaces. FulaSeal PRO™ 660 is formulated with high viscosity/body, reducing the risk of slumping when used for bonding applications.

Key Benefits

- ±25% Joint movement capability
- Fast skin formation time and cure rate
- Excellent weathering and UV resistance
- AS4020-2005 approved
- Neutral cure
- Excellent non-slump properties

Uses

- Glazing of butt joints and colonial bars, fin glazing
- Sealing laminated and reflective glass
- Potable water tank construction
- Bonding of solar pool heating collectors, fast moving industrial assembly
- Architectural facades and non-structural glazing

Specifications

- Movement Capability ±25%
- Skin Time 10 - 15 mins (23°C, 50% RH)
- Cure Time 2 - 3mm/day (23°C, 50% RH)
- Hardness Shore A. ca. 21
- VOC <30g/L
- Area Interior/exterior
- Potable Water Approved Yes
- Product Chemistry Neutral cure silicone

FulaSeal PRO™ 260
Heat Resistant RTV Silicone

FulaSeal PRO™ 260 is a high performance RTV (Room Temperature Vulcanising) silicone adhesive/sealant formulated for use where high heat resistance is required. FulaSeal PRO™ 260 can withstand continuous temperatures of 260°C and intermittent temperatures of up to 312°C and can be used for a variety of industrial bonding and sealing applications.

**Key Benefits**
- 100% industrial grade silicone for sealing and bonding
- Heat resistant up to 312°C
- Rapid curing - acetic cure
- Permanently flexible; ±25% joint movement capability
- Excellent resistance to weathering and UV radiation
- Resistant to vibration
- High tensile strength

**Uses**
- General industrial bonding and sealing
- Sealing industrial ovens, flues and ductwork
- Forming in-situ gaskets for high temperature applications e.g. engines
- Forming gaskets

**Specifications**
- **Movement Capability**: ±25%
- **Skin Time**: 10 - 20 mins (23°C, 50% RH)
- **Cure Time**: 3mm/day (23°C, 50% RH)
- **Hardness**: Shore A. 25
- **VOC**: 6g/L

FulaSeal PRO™ 730 RTV Adhesive & Sealant Silicone

FulaSeal PRO™ 730 silicone is a multi-purpose, acetic cure RTV silicone adhesive and sealant used for a wide range of glazing and industrial sealing and bonding applications. FulaSeal PRO™ 730 cures to form a tough rubber-like film which out-performs standard silicones and is UV, vibration and temperature resistant.

**Key Benefits**
- 100% industrial grade silicone
- Industrial sealing and bonding
- Superior adhesion to glass
- Permanently flexible; ±25% joint movement capability
- Strong adhesion, sag resistant
- High tensile strength

**Uses**
- General industrial bonding
- Thread sealing and emergency gaskets
- Glazing inc. toughened glass
- Bonding and sealing auto or appliance trim and parts
- Sealing flashing in vents, flues, marine cabins and aluminium windows
- Caulking joints in sheet metal stacks and ducting

**Specifications**
- **Movement Capability**: ±25%
- **Skin Time**: 20 mins (23°C, 50% RH)
- **Cure Time**: 3mm/day (23°C, 50% RH)
- **Hardness**: Shore A. 25

FulaSeal™ 700 Roof & Gutter Silicone Sealant

FulaSeal™ 700 Roof & Gutter Silicone Sealant is a neutral cure sealant that does not corrode materials commonly used in roofing construction. FulaSeal™ 700 Roof & Gutter is ideal for sealing and weatherproofing roofing, guttering, flashings and rainwater systems.

**Key Benefits**
- For use in contact with potable (drinking) water (AS4020)
- Permanently flexible; ±25% joint movement capability
- Suitable for use with aluminium, galvanised, zinc and Colorbond roofing materials.
- Neutral cure – will not corrode metal or concrete
- Waterproof, UV and weather resistant

FulaSeal™ 705 Brick & Concrete Silicone Sealant

FulaSeal™ 705 Brick & Concrete Silicone Sealant is a neutral cure sealant specially designed for use on surfaces where a weatherproof and flexible seal is required. FulaSeal™ 705 Brick & Concrete is ideal for sealing joints in brick walls and sealing expansion joints in concrete.

---

FulaSeal™ 710 Glazing Silicone Sealant

FulaSeal™ 710 Glazing Silicone Sealant is an acetic cure sealant specially formulated for use in general glazing and sealing applications. FulaSeal™ 710 combines resistance to weathering with excellent adhesion and flexibility.

---

**Key Benefits**
- Grey colour to match concrete structures
- Permanently flexible; ±25% joint movement capability
- Neutral cure – will not corrode metal or concrete

**Uses**
- Sealing and weatherproofing
- Sealing and filling concrete gaps and cracks
- Sealing and weatherproofing expansion joints in concrete and brickwork

**Specifications**
- Movement Capability ±25%
- Skin Time 10 - 15 mins (23°C, 50% RH)
- Cure Time 2 - 3mm/day (23°C, 50% RH)

FulaSeal™ 720 Paintable Hybrid Silicone Sealant

FulaSeal™ 720 Paintable hybrid silicone sealant is a premium quality sealant specially designed to be permanently paintable. FulaSeal™ 720 Paintable has a ±25% joint movement capability, exhibits no shrinkage during curing and can be used for interior/exterior applications.

**Key Benefits**
- Paintable at any time once skinned with acrylic paints
- Exhibits no shrinkage during curing resulting in a superior finish compared to traditional water-based gap fillers
- Bonds to most surfaces without priming
- Superior flexibility; ±25% joint movement capability
- Waterproof

**Uses**
- Sealing and weatherproofing building joints and gaps where a highly flexible, paintable sealant is required that exhibits no shrinkage
- Sealing gaps and joints in timber and fibre cement sheet cladding
- Filling gaps between ceilings and cornices, walls, architraves and skirting boards, caulking window and door surrounds

**Specifications**
- **Movement Capability**: ±25%
- **Skin Time**: 30 - 40 mins (23°C, 50% RH)
- **Cure Time**: 2 - 3mm/day (23°C, 50% RH)

  - Ctn Qty: **12**

---

FulaSeal™ 740 Bathroom & Kitchen Silicone Sealant

FulaSeal™ 740 Bathroom & Kitchen Silicone Sealant is specifically designed for use in wet area joint sealing applications involving non-porous surfaces commonly found in bathrooms, kitchens and laundries, such as porcelain, glass and ceramic tiles.

**Key Benefits**
- Contains fungicide that resists mould and mildew
- Permanently flexible; ±25% joint movement capability
- Acetic cure
- Seals water tight

**Uses**
- Sealing and waterproofing around sinks and other plumbing fixtures
- Repairing joints in shower bases.
- Sealing around bath tubs and spas

**Specifications**
- **Movement Capability**: ±25%
- **Skin Time**: 10 - 15 mins (23°C, 50% RH)
- **Cure Time**: 2 - 3mm/day (23°C, 50% RH)
- **Hardness**: Shore A. 20
- **VOC**: <10g/L

  - Ctn Qty: **20**

---
**FulaSeal™ 750 Multi Purpose Silicone Sealant**

FulaSeal™ 750 Multi Purpose Silicone Sealant is suitable for a wide range of applications where a versatile, general purpose, non-corrosive sealant is required.

**Key Benefits**
- Permanently flexible; ±25% joint movement capability
- Neutral cure – will not corrode metal or concrete
- Waterproof
- Suitable for potable (drinking) water (AS4020)

**Uses**
- Sealing and weatherproofing buildings
- Sealing gutters and downpipes
- Sealing external metal wall cladding

**Specifications**

| Movement Capability | ±25% |
| Skin Time | 10 - 15 mins (23°C, 50% RH) |
| Cure Time | 2 - 3mm/day (23°C, 50% RH) |

**FulaSeal™ 760 General Glazing Silicone Sealant**

FulaSeal™ 760 General Glazing Silicone Sealant is a coal black, neutral cure sealant that cures to form a permanently flexible seal that is UV stable and waterproof with a low gloss level finish.

**Key Benefits**
- Ideal for general glazing
- Permanently flexible; ±25% joint movement capability
- UV, weather and water resistant
- Neutral cure – will not corrode metal or concrete
- Low gloss level finish resembles pre-formed silicone glazing rubber profiles

**Uses**
- Weather sealing and glazing
- General metal fabrication
- Sealing air conditioning and ventilation ductwork

**Specifications**

| Movement Capability | ±25% |
| Skin Time | 10 - 15 mins (23°C, 50% RH) |
| Cure Time | 2 - 3mm/day (23°C, 50% RH) |

FulaSeal™ 770
Sanitary Silicone Sealant

FulaSeal™ 770 Sanitary Silicone Sealant is a premium quality, 100% silicone sealant specifically designed for use in wet areas where a neutral cure sealant is required that contains a mould and mildew inhibitor. FulaSeal™ 770 Sanitary Silicone a professional quality wet area sealant that provides excellent adhesion and is suitable for contact with aluminium shower screens and other substrates susceptible to corrosion.

Key Benefits

- Contains a fungicide that resists mould and mildew growth
- Interior/Exterior
- Permanently flexible; ±25% joint movement capability
- Neutral cure – non-corrosive
- Strong adhesion to a wide range of wet area construction materials
- Suitable for frequently wet areas

Uses

- Sealing around showers, sinks, bathtubs, spas and sanitary ware
- Sealing of wall to wall and wall to floor junctions in internal and external tiles areas
- Sealing of joints between laminated kitchen benchtops and sinks
- Bonding of glass splashbacks in conjunction with double sided tape
- Sealing in laundries

FulaSeal™ 780 Plumbers Silicone Sealant

FulaSeal™ 780 Plumbers Silicone Sealant is a non-corrosive neutral cure sealant that can be used on a wide range of substrates. It is ideal for roofing applications, exterior cladding, guttering, flashing, downpipes, general plumbing and is compatible with drinking water storage systems.

Key Benefits
- For use with potable (drinking) water (AS4020)
- Permanently flexible; ±25% joint movement capability
- Interior/exterior
- Neutral cure – will not corrode steel or galvanised iron
- Waterproof

Uses
- Used in sheet metal roofing applications
- Exterior metal wall cladding
- Sealing guttering, downpipes and flashings
- Sealing of ductwork and ventilation systems
- Water tank construction
- Re-bonding of loose ridge-capping and valley tiles
- Bonding of gutter leak prevention systems

- Fibreglass
- Plasterboard
- Terracotta
- Many plastics (pre-test)
- Glass

Refer to TDS for additional technical information.
FulaSeal™ 790 Mirror & Metal Silicone Sealant

FulaSeal™ 790 Mirror & Metal Silicone is a premium quality silicone adhesive/sealant ideal for a wide range of glazing applications including bonding standard silver-backed mirrors to walls and other general purpose metal bonding and sealing applications requiring a professional quality, neutral cure silicone.

**Key Benefits**
- Permanently flexible; ±25% joint movement capability
- Interior/exterior applications
- UV and weather resistant
- Neutral cure – non-corrosive

**Uses**
- Sealing heating, ventilation and air-conditioning units
- Non structural glazing
- General metal assembly
- Bonding standard silver-backed mirrors

**Specifications**
- **Movement Capability**: ±25%
- **Skin Time**: 7 - 10 mins (23°C, 50% RH)
- **Cure Time**: 2 - 3mm/day (23°C, 50% RH)
- **Hardness**: Shore A. 24
- **VOC**: <25g/L
- **Area**: Interior/exterior
- **Potable Water Approved**: No
- **Product Chemistry**: Neutral cure silicone

**Compatible Substrates**
- Glass
- Mirror
- Aluminium
- Stainless steel
- Zinc/galvanised steel
- Brick
- Ceramic
- Concrete
- Masonry
- Many plastics (pre-test)

Refer to TDS for additional technical information.

---

FulaSeal™ 701 Flexible Ultra Clear Sealant

FulaSeal™ 701 Flexible Ultra Clear Sealant is an easy to use, highly flexible, water based sealant, which dries clear.

FulaSeal™ 701 Flexible Ultra Clear Sealant is suitable for many interior and exterior applications and combines high joint movement characteristics with excellent weather resistance.

**Key Benefits**
- Dries clear
- Water clean up
- Interior/exterior use
- Permanently flexible; ±25% joint movement capability
- Mould resistant
- Paintable
- Low odour
- Alternative to silicone or solvent based sealants

**Uses**
- Over-sealing joints in polycarbonate roofing and at interfaces with other substrates
- Sealing gaps in weatherboard and around window and door openings prior to painting
- Perimeter sealing of polystyrene panels and mouldings

**Note**: Protect from water until sufficiently cured

**Specifications**
- **Movement Capability**: ±25%
- **Skin Time**: 15 - 25 mins (23°C, 50% RH)
- **Cure Time**: Variable dependent on conditions
- **Hardness**: Shore A. 10
- **VOC**: 24g/L
- **Area**: Interior/exterior
- **Mould/Mildew Resistant**: Yes
- **Potable Water Approved**: No
- **Product Chemistry**: Acrylic

**Compatible Substrates**
- Polycarbonate roofing
- Glass
- Fibre cement sheeting
- Masonry inc mortar
- Gypsum
- Metal
- Fibreglass
- Timber inc weatherboard
- Many plastics (pre-test)

Refer to TDS for additional technical information.
FulaSeal PRO™ 840NS Cool Room Mastic

FulaSeal PRO™ 840NS is a non-skinning and non-corrosive polybutene based sealant, designed specifically for small joints in cool room installation. FulaSeal PRO™ 840NS is also suitable for concealed lap joints between plastics, metals and a wide range of common substrates.

Key Benefits

- Non-skinning/non-hardening mastic
- Suitable for sealing small joints up to 3mm
- Excellent barrier to moisture
- Mould and mildew resistant
- Strong adhesion to metals and many substrates
- Safe on polystyrene
- Excellent slump resistance

Uses

- Sealing of small joints between insulated panels in cool/refrigerated rooms
- Sealing lap joints between plastics, metal, timber, glass, masonry and expanded foam panels

Specifications

| Movement Capability | Accommodates minimal movement i.e. differential movement between panels/substrates - not elastomeric |
| Skin Time | Non-skinning |
| Cure Time | N/A |
| Ready for service immediately after application, non-hardening, remains permanently flexible |
| Hardness | N/A |
| VOC | 72g/L |
| Area | Interior |
| Mould/Mildew Resistant | Yes |
| Product Chemistry | Polybutene Mastic |

Refer to TDS for additional technical information.

- Steel & Stainless Steel
- Galvanised steel
- Aluminium
- Sandwich Panels
- Alucobond
- Zincalume
- Plastics (pre-test)
- Polystyrene
- Fibreglass
- Timber
H.B. Fuller’s flooring adhesive products are formulated for both sub-flooring and overlay flooring applications. Compatible with most traditional solid and engineered wood overlay and wet area sub-flooring products, they provide a permanently flexible adhesive layer, accommodating movement in the floor system and ensuring ongoing structural integrity.
Floor Bond™ XMS Sub-Floor Flexible Adhesive

Floor Bond™ XMS Sub-Floor is a high strength, high performance, permanently flexible sub-flooring and construction adhesive designed for bonding both wood and cement based wet area flooring products to either timber or steel joists. Floor Bond™ XMS Sub-Floor is the ideal adhesive where long term flexibility is required, accommodating movement in the flooring system over time and reducing the occurrence of creaks developing.

**Key Benefits**

- Non-hazardous – solvent and isocyanate free
- Accommodates movement in the floor over time, reducing the occurrence of subsequent creaking
- Permanently flexible over a wide service temperature range of -40°C to +90°C
- Suitable for both timber and steel joists
- Long open/working time ensuring adequate wet adhesive transfer between joists and floor sheet

**Uses**

- Bonding wood sub-floor products to timber or steel joists
- Bonding cement based wet area sub-floor products to timber or steel joists
- As a premium quality, multi-purpose construction adhesive where permanent flexibility is required

Floor Bond™ XMS
Timber Flooring Adhesive

Floor Bond™ XMS is a high strength, high performance, hybrid polymer flooring adhesive designed to provide a permanently flexible bond for all wood based flooring products. Floor Bond™ XMS provides a non-hazardous alternative to traditional polyurethane timber flooring adhesives being free from solvents and isocyanate. Floor Bond™ XMS contains no water therefore the adhesive exhibits no shrinkage during curing and the risk of deforming timber flooring is eliminated.

Key Benefits
- Permanently flexible
- Non-hazardous – contains no solvents or isocyanates
- Long open/working time
- Smooth and easy to trowel
- Excellent non-slump properties - forms stable peaks once applied with a notched trowel
- Acoustic rated in conjunction with matting; CSIRO Report No. INR 157
- Will not bubble when curing
- Cleans easily from the surface of pre-finished engineered boards without changing the gloss level of the pre-finish

Fire Rated

H.B. Fuller is a leading formulator and manufacturer of fire rated sealants and fire resistant fillers. Engineered to provide superior performance and durability, H.B. Fuller fire rated sealants and fillers are designed to perform day-in day-out and to work when it really counts.
FulaFoam™
Fire Resistant Expanding Foam

FulaFoam™ Fire Resistant Expanding Foam is a single component, fire resistant polyurethane expanding foam filler. FulaFoam™ Fire Resistant can provide up to 3 hours fire resistance and provides high acoustic insulation. FulaFoam™ Fire Resistant will not shrink during curing and will provide an air- and smoke-tight seal. The cured foam can be cut, sanded, plastered or painted.

Key Benefits

- Fire resistant polyurethane expanding foam (Appraised to AS1530.4)
- Efficient seal against smoke
- High bond strength to most substrates
- High thermal and acoustic insulation
- Does not contain CFC’s or H-CFC’s
- Pink in colour for ease of identification

Uses

- Fire resistant installation of window and door frames
- Fire and smoke resistant sealing of connections between partition walls, ceilings and floors
- Filling of cavities
- Applications where fire resistant characteristics are required such as:
  - Sealing of all openings in roof constructions
  - Sealing of cable and pipe penetrations
  - Creation of a sound-proof screen
  - Bonding of insulation materials
  - Application of sound-deadening layers
  - Improving thermal insulation in cold store areas

Consult a fire engineer before use in a fire rated application

# Firesound™
## Fire Rated Acoustic Sealant
Firesound™ is a premium quality, flexible construction sealant formulated to perform as a barrier to the passage of both fire and sound through construction joints and service penetrations in concrete, aerated concrete, block work, brickwork and fire-rated plasterboard.

### Key Benefits
- Premium quality, flexible construction sealant accommodating up to ±20% joint movement
- Fire rated for up to 4 hrs in joints up to 50 mm when tested in accordance with AS1530.4
- Intumescent; expands to compensate for deflection of building elements that result from exposure to extreme heat or fire
- Non-hazardous, free from solvents, isocyanates and asbestos
- Excellent acoustic performance; low shore A hardness and high density formula achieving up to Rw 65 (-2;-5) when tested in accordance with AS1276.1
- Low VOC Green star project compliant sealant, 31g/L (SCAQ Rule 1168.)
- Paintable
- UV Stable

### Uses
- Sealing exterior and interior construction joints that are subject to movement (up to ±20%) in pre-cast concrete panels, block work, brickwork, aerated concrete and fire-rated plasterboard
- Gaps around cables, metal pipes, conduits, busways and ducts that penetrate walls, floors and ceilings
- Refer to page 58 for Recommended Joint Configurations

FulaCaulk™ FR
Fire Rated Acrylic Sealant

FulaCaulk™ FR is a one part, water-based construction sealant for sealing joints in applications where a fire resistance rating is required. It has been tested in accordance with AS1530.4-2014.

Key Benefits

- Fire rating for gaps up to 40mm
- Up to 4 hour fire rating (AS1530.4)
- Good flexibility; ±15% joint movement capability
- For interior use
- Paintable
- Can be applied to damp surfaces
- Intumescent; expands when exposed to fire or extreme heat

Uses

- Sealing interior construction joints that are subject to movement (up to ±15%) in concrete panels, block work, brickwork and fire-rated plasterboard
- If joint movement is not required, can be used as a putty for filling holes in fire rated substrates

Check certification requirements or consult a fire engineer before use in a fire rated application

Multi Use

Having the right tools for the job is critical, but having a tool that can manage multiple high performance functions is increasingly important. Our range of multi-use adhesive and sealant products combine the best features of a high performance adhesive with those of an industrial grade multi-purpose sealant.
Tool Box™ Original MS Adhesive & Sealant

Tool Box™ Original is a high performance multi-purpose adhesive and sealant in one based on MS polymer technology. Toolbox original cures to form a high strength, permanently flexible waterproof bond adhering to a wide variety of materials. It performs the function of both a high strength adhesive as well as a highly durable joint sealant. Tool Box™ Original provides a non-hazardous alternative to traditional polyurethane elastomeric adhesive/sealants and is a true ‘tool box’ in a cartridge.

Key Benefits

- Permanently flexible high strength bonding and sealing in one
- High performance adhesion to just about any substrate without the use of primer
- Interior/exterior – waterproof and UV stable
- Paintable
- Fast skinning and curing
- Non-hazardous; isocyanate and solvent free
- Mould resistant
- Excellent adhesion to Colorbond®
- Low VOC: 30g/L

Uses

- Sealing lap joints, flashings, box guttering and ductwork
- Bonding of standard mirrors, glass splashbacks and bathroom fixtures
- Adhesive for fixing wall panels to studs, flooring to joists
- Re-fixing loose ceramic tiles
- Bonding and sealing acrylic/ABS shower units
- Adhering end-caps to retaining walls
- Sealing gaps and expansion joints in concrete, brick, mortar, metal and stonework
- Bonding of thermal and acoustic insulation panels, signs and aluminium composite panels
- Bonding stair nosing, aluminium skirting and profiles

Specifications

- Cured State: Elastomeric – very flexible
- Joint Width: Up to 30mm
- Movement Capability: ±20%
- Skin Time: 10 - 15 mins (23°C, 50% RH)
- Cure Time: 2mm/day (23°C, 50% RH)
- Hardness: Shore A. 55
- VOC: 30g/L
- Area: Interior/exterior
- Mould/Mildew Resistant: Yes
- Product Chemistry: MS polymer

- Porcelain
- Steel inc. stainless, zinc, galvanised
- Aluminium
- Polystyrene
- Plasterboard
- Timber
- Fibreglass
- Acrylic, ABS
- Many coatings, plastics and rubbers (pre-test)

Refer to TDS for additional technical information.
Tool Box™ High Tack
Hybrid Polymer Adhesive & Sealant

Tool Box™ High Tack is a high modulus, elastomeric hybrid polymer adhesive/sealant with superior instant grab strength. Its high aggressive tack makes it ideal for bonding heavy objects and eliminates the need for mechanical fixing, bracing or propping during the curing process.

Key Benefits

- Bonds aggressively to a wide range of substrates without primer
- Elastomeric
- Aggressive tack
- Fast skinning and curing
- Non-hazardous; isocyanate and solvent free
- Interior/exterior
- Shock and impact resistant
- Suitable for surfaces prone to vibration

Uses

- Bonding heavy objects without the use of bracing or propping whilst the adhesive cures
- High strength, flexible bonding where waterproof joints are required
- Suitable for vehicle assembly including caravan construction
- Concealed fixing of signs, panels, thermal and acoustic insulation products

Tool Box™ Invisible Hybrid Polymer Adhesive & Sealant

Tool Box™ Invisible is a clear multi-purpose hybrid polymer adhesive and sealant with outstanding clarity. Tool Box™ Invisible is ideal for creating invisible seals and for bonding a wide variety of materials to create a durable, high strength, waterproof bond-line.

**Key Benefits**
- Cures with outstanding clarity
- Bonds aggressively to a wide range of substrates without primer
- Solvent and isocyanate free
- Cures to form a permanently flexible and elastic bond
- Fast skinning and curing
- Interior/exterior – high UV resistance
- Mould, chemical and heat resistant (to 80°C)
- Paintable

**Uses**
- Multi-purpose bonding where one or more substrate is clear
- Bonding and sealing applications where clean up of excess adhesive/sealant from adjacent substrates is difficult or requires painting
- Sealing frameless shower screens
- Sealing of joints in glass
- Sealing gaps in concrete, brick, mortar, metal and stonework
- Suitable for Green Building applications: zero VOC: 0g/L

Fillers

When building and renovating, construction gaps, cracks and holes need a fast professional result the first time. Use our range of fillers to give your project a high quality finish.
Caulk in Colours™
Acrylic Sealant

Caulk in Colours™ acrylic sealant is a premium quality flexible, joint sealant for use in sealing expansion joints and gaps in construction work and tiling. It can be used for interior and exterior joint sealing where a water and mould resistant sealant is required that also has good UV resistance. Caulk in Colours™ dries “true” to its wet colour and resists long term splitting and cracking.

Key Benefits
- Dries ‘true’ to wet colour
- Flexible: ±20% joint movement capability
- Interior/exterior use
- Resists long term splitting and cracking
- Suitable for vertical and horizontal joints
- Paintable
- Water clean up
- Mould resistant

Uses
- Wet area joint sealing
- Sealing gaps between baths, basins, splash-backs and tiles
- Expansion joints in brickwork, walls and tiles
- Sealing around architraves, window and door frames
- Expansion joints around the perimeter of timber floors

Note: Protect from water until sufficiently cured. Not suitable for continuous or repeated immersion in water.

Specifications
- Cured State: Flexible
- Joint Width: Up to 15mm
- Movement Capability: ±20%
- Skin Time: 10 mins (23°C, 50% RH)
- Cure Time: Variable dependent on conditions
- Hardness: Shore A. ca. 40
- VOC: 22g/L
- Area: Interior/exterior
- Mould/Mildew Resistant: Yes
- Product Chemistry: Acrylic

Compatible Substrates
- Concrete
- Fibre cement sheeting
- Brick
- Steel inc. stainless
- Zinc/galvanised steel
- Aluminium
- Plasterboard
- Timber
- Particleboard
- Plywood
- Ceramic
- Polystyrene
- Polyurethane Foam

Refer to TDS for additional technical information.
Caulk in Colours™ has been providing the trade preferred finish to projects for decades. Matched with the changing trends in tile and paint colours, Caulk in Colours™ is the perfect match of strength and flexibility that stands up to the test of time.

**FulaFoam™ Expanding Foam**

FulaFoam™ Expanding Foam is a triple expanding, general purpose, polyurethane foam designed to fill large gaps, holes and cavities. FulaFoam™ Expanding Foam can be used internally and externally, bonds to most common construction materials to provide an airtight, moisture resistant seal with excellent thermal insulation properties.

**Key Benefits**
- Triple expanding
- Fills cavities without shrinking
- Can be cut to trim
- Polystyrene safe
- Paintable
- Ozone friendly

**Uses**
- Sealing holes and around plumbing and electrical penetrations through walls and floors
- Filling wide gaps and cracks around window frames
- Sealing against draughts, moisture and noise

**Specifications**
- **Finish**: Smooth uncut, aerated cut
- **Maximum Crack/Hole Size**: Fill big cavities in stages
- **Skin Time**: 10 - 15 mins
- **Cure Time**: 30mm bead 80% in 2 hrs, full cure in 24 hrs
- **Sandalbe**: No
- **Area**: Interior/exterior (if painted)
- **Product Chemistry**: Polyurethane
- **Refer to TDS for additional technical information.**

**Available Products**
- **FulaFoam™ Foam 300ml Can**
  - Colour: yellow
  - Ctn Qty: 12
  - Resource Code: 7031334161

  - Resource Code: 7031334007

**FulaFoam™ Fire Resistant Expanding Foam**

FulaFoam™ Fire Resistant Expanding Foam will fill cavities, is fire resistant for up to 3 hours and provides high acoustic insulation. FulaFoam™ Fire Resistant will not shrink when cured and will provide an airtight seal, and can be cut to trim.

**Key Benefits**
- Fire resistant polyurethane expanding foam (appraised to AS1530.4)
- Efficient seal against smoke
- High bond strength
- High thermal and acoustic insulation
- Does not contain CFC’s or H-CFC’s

**Uses**
- Filling cavities for fire and smoke resistant installation of window and door frames, between partition walls, ceilings and floors
- Applications where fire resistant characteristics are required

**Specifications**
- **Finish**: Smooth uncut, aerated cut
- **Maximum crack/hole size**: Fill big cavities in stages
- **Skin time**: 12 - 16 mins
- **Cure time**: 18 hours (23°C), 24 hours (-5°C)
- **Sandalbe**: No
- **Area**: Interior / Exterior (if painted)
- **Product Chemistry**: Polyurethane
- **Refer to TDS for additional technical information.**

**Compatible Substrates**
- **Concrete**
- **Brick**
- **Fibre cement sheeting**
- **Timber & plywood**
- **Particleboard**
- **Plasterboard**
- **Fibreglass**
- **Zinc/galvanised steel**

  - Colour: pink
  - Ctn Qty: 12
  - Resource Code: 7011954007
FulaFoam™ Pro Gun Triple Expanding Foam

FulaFoam™ Pro Gun applied triple expanding foam is a general purpose, polyurethane foam that will seal against noise and moisture, as well as fill holes and penetrations.

**Key Specifications**
- **Skin time**: 10 - 14 mins
- **Cure time**: 30mm bead 80% in 2 hrs, full cure 24 hrs

**Compatible Substrates**
- Concrete & Brick
- Fibreglass
- Plasterboard
- Metals
- Timber/Particleboard
- Polystyrene

**Available Products**
- **FulaFoam™ Pro Gun Triple Expanding Foam 750ml Can**
  - Resource Code: 7068444161
  - Colour: yellow
  - Ctn Qty: 12

**Refer to TDS for additional technical information.**

**Key Benefits**
- Triple expanding
- Includes single use straw applicator
- Fills cavities without shrinking
- Polystyrene safe
- Can be cut to trim
- Paintable
- Ozone friendly

**Uses**
- Sealing holes and around plumbing and electrical penetrations through walls and floors
- Filling wide gaps and cracks around window frames
- Sealing against draughts, moisture and noise
- Acoustic and thermal insulator
- Concrete form sealant

---

FulaFoam™ Pro Gun Low Expansion Foam

FulaFoam™ Pro Gun Low Expansion Foam offers highly efficient thermal and acoustic properties and prevents the occurrence of substrate warping/distortion due to expansion related pressure.

**Key Specifications**
- **Skin time**: 10 - 14 mins
- **Cure time**: 18hrs (at 23°C), 24hrs (-5°C)

**Compatible Substrates**
- Concrete & Brick
- Ceramics
- Masonry & Render
- Metals
- Timber/Particleboard
- Plasterboard

**Available Products**
- **FulaFoam™ Pro Gun Low Expansion Foam 750ml Can**
  - Resource Code: 7200544161
  - Colour: green
  - Ctn Qty: 12

**Refer to TDS for additional technical information.**

**Key Benefits**
- Fills large holes, gaps and cavities without shrinking or causing warping of substrates
- Cured foam remains flexible
- Ready to cut in 30 minutes
- Unique micro-cell structure provides improved thermal and acoustic insulation, up to 50% better than traditional polyurethane foams

**Uses**
- Sealing joints and gaps around window and door installations to improve thermal and acoustic insulation
- Bonding of lightweight polystyrene panel edges and mouldings
- Bedding of services within insulated wall panels

---

FulaFoam™ Gun & Foam Cleaner

FulaFoam™ Cleaner is a solvent based cleaner for removing uncured polyurethane from applicator guns and, tools. It can also be used to clean most building surfaces.

**Specifications**
- **Product Chemistry**: Solvent

**Compatible Substrates**
- Timber
- Masonry
- Metal
- Ceramics

**Available Products**
- **FulaFoam™ Cleaner 500ml Can**
  - Resource Code: 7319624021
  - Colour: clear
  - Ctn Qty: 12

**Refer to TDS for additional technical information.**

---
**FulaFill™ Multi-Purpose Gap Filler**

FulaFill™ Multi-Purpose Gap Filler is a premium quality, acrylic gap filler designed for general purpose interior and exterior gap filling prior to painting. Its non-slump formula makes it easy to apply and clean-up is just as simple.

**Key Benefits**

- Remains flexible - years after use
- Tools and finishes perfectly
- Paintable
- Interior/exterior
- Water clean up
- Does not slump or sag
- Smooth Tooling and finishing

**Uses**

- Filling gaps around skirting boards, cornices and architraves
- Filling gaps around window frames

Note: Protect from water until sufficiently cured

FulaFill™ Building Filler

FulaFill™ Building Filler is a two-part polyester filler designed to repair damage and holes where movement is not expected. Once cured, FulaFill™ Building Filler can be painted, sanded, chiselled, planed, filed and routed.

- Fills gaps, cracks, holes and other forms of damage and imperfection in most common building materials
- 2-Part filler; cures effectively on non-porous substrates such as metal
- Interior/exterior (if protected)
- Will not shrink or slump
- Easy to sand and paint

**Key Benefits**

- Filling architraves and doors
- Filling furniture and timber
- Filling window frames and sashes

**Uses**

**Specifications**

- Finish: Fine
- Maximum Crack/Hole Size: Build up holes greater than 40mm in stages
- Gel Time: 6 mins
- Cure Time: 30 mins
- Sandable: Yes (after 30 mins)
- Area: Interior/exterior (if protected)
- Product Chemistry: Polyester

**Compatible Substrates**

- Fibreglass
- Metal
- Fibre cement sheeting
- Concrete
- MDF
- Timber
- Plasterboard

FulaFill™ Heavy Duty Cracks and Holes Filler

FulaFill™ Heavy Duty Cracks and Holes Filler is an interior/exterior grade filler suitable for filling all cracks and holes up to 25mm width. FulaFill™ Heavy Duty Cracks and Holes Filler cures to a hard, sandable finish that can be painted and is suitable for most common porous construction materials.

- Filling large cracks, holes and gaps where flexibility is not required
- Providing a smooth surface over many substrates

**Key Benefits**

- Interior/exterior applications
- Paintable
- Smooth texture – ideal for internal walls
- One part – ready to use
- Sandable
- Minimal shrinkage during curing; no need to overfill

**Uses**

**Specifications**

- Finish: Fine
- Max. Crack/Hole Size: 25mm
- Skin Time: 30 mins, sandable time dependent on volume applied
- Cure Time: 7 days full cure
- Sandable: Yes
- Paintable: Yes
- Area: Interior/exterior
- Product Chemistry: Acrylic

**Compatible Substrates**

- Brick
- Concrete
- Fibre cement sheeting
- Masonry
- Timber
- Particleboard
- Plasterboard

Replacement for: max fill™ EASY FILLER multi-purpose filler
**Fuller Trade™ Plumbing Silicone**

Plumbing Silicone is a neutral cure water resistant sealant used to seal roof and gutter applications. Suitable for potable water, Plumbing Silicone is compatible with most substrates.

### Key Specifications
- **Skin Time**: 15 - 25 mins (23°C, 50% RH)
- **Cure Time**: 2mm/day (23°C, 50% RH)

### Key Compatible Substrates
- Metals
- Bricks/Masonry
- Ceramics
- Plasterboard
- Fibreglass
- Glass

### Key Benefits
- For use with potable (drinking) water (AS4020)
- ±25% joint movement
- Interior/exterior applications
- Neutral cure
- Water resistant

### Uses
- Sheet metal and aluminium roofing applications
- Exterior cladding
- Guttering
- Flashing
- Downpipes

### Available Products
- **Fuller Trade™ Plumbing Silicone 300g Cartridge**
  - Resource Code: 6004484224
  - Translucent
  - Ctn Qty: 20
- **Fuller Trade™ Plumbing Silicone 400g Cartridge**
  - Resource Code: 6003084246
  - Grey
  - Ctn Qty: 20

Refer to TDS for additional technical information.

**Fuller Trade™ Wet Area Plumbing Silicone**

Wet Area Plumbing Silicone is a neutral cure silicone sealant for use in wet areas such as bathrooms and kitchens.

### Key Specifications
- **Skin Time**: 15 - 25 mins (23°C, 50% RH)
- **Cure Time**: 2mm/day (23°C, 50% RH)

### Key Compatible Substrates
- Metals
- Bricks/Masonry
- Ceramics
- Plasterboard
- Fibreglass
- Glass

### Key Benefits
- Contains fungicide that resists mould and mildew
- Neutral cure - Will not corrode metal or concrete
- Permanently flexible
- ±25% joint movement
- Primerless adhesion

### Uses
- Sealing around showers
- Sealing inside bath tubs
- Sealing around sinks
- Sealing and weather proofing sanitary ware and spas
- Suitable for wet areas

### Available Products
- **Fuller Trade™ Wet Area Plumbing Silicone 300g Cartridge**
  - Resource Code: 6009104220
  - White
  - Ctn Qty: 20

Refer to TDS for additional technical information.

**Fuller Trade™ Formwork Silicone**

Formwork Silicone sealant is a neutral cure non-corrosive sealant designed for sealing formwork and bedding applications to prevent loss of moisture in concrete.

### Key Specifications
- **Skin Time**: 10 mins (23°C, 50% RH)
- **Cure Time**: 2mm/day (23°C, 50% RH)

### Compatible Substrates
- Timber/Plywood
- Masonry/Bricks
- Metals
- Concrete

### Key Benefits
- Flexible
- Non-bleeding, will not stain concrete
- Neutral cure

### Uses
- Provides a waterproof sealed formwork face
- Sealing form ply sheet edges, joints, gaps or junctions in formwork
- Eliminates grout leakage during the formwork process

### Available Products
- **Fuller Trade™ Formwork Silicone 300g Cartridge**
  - Resource Code: 7224404033
  - Translucent
  - Ctn Qty: 20

Refer to TDS for additional technical information.
Fuller Trade™ Gap Filler
Gap Filler is a general purpose acrylic based gap filler. Suitable for most building substrates, it’s easy to apply and cleans up with water.

**Key Benefits**
- Remains flexible
- Easy to apply acrylic sealant
- Tools and finishes perfectly
- Paintable
- Interior/exterior use
- Resists slump and sag
- No mess – water clean up

**Uses**
- Patching gaps around skirting boards, architraves, cornices, ceramic tiles (not in shower)
- Window frames prior to painting inside or outside
- General purpose fit out finishing

Note: Protect from water until sufficiently cured

---

Fuller Trade™ Construction Adhesive
Construction Adhesive is a multi-purpose adhesive ideal for bonding most common building materials. Construction Adhesive is compatible with most substrates including: concrete, masonry, metals, timber, plasterboard, and ceramic tiles.

**Key Benefits**
- Repositionable for up to 20 mins after application
- High bond strength
- One part - no mixing
- Reduces squeaking associated with nail ride
- Paintable

**Uses**
- Fitting wood panelling, fibre cement, plasterboard, plywood and strip flooring to wooden or metal framework
- Bonding skirting boards, architraves and trims to walls
- Installing timber wall panelling to timber and metal studs

---

### Specifications
- **Finish** Fine
- **Maximum Crack/Hole Size** 25mm
- **Skin Time** 15 mins (23°C, 50% RH)
- **Cure Time** Variable dependent on conditions
- **Sandable** Yes
- **Area** Interior/exterior
- **Product Chemistry** Acrylic

Refer to TDS for additional technical information.

### Compatible Substrates
- Brick
- Concrete
- Masonry
- Fibre cement sheeting
- Plasterboard
- Aluminium
- Ceramic
- Timber**
- Particleboard
- Polystyrene

**Note:** not suitable for weatherboard

Caulking Guns
H.B. Fuller caulking guns are engineered for trade using quality materials and components with performance and reliability in mind.

**Tough Red Caulking Gun**
- Suitable for 300ml cartridges
- 18:1 compression ratio - ideal for high viscosity adhesives & sealants
- 5mm stroke
- Professional quality heavy duty gun

Resource Code: 6075124094

**Easy Squeeze Caulking Gun**
- Suitable for 300ml cartridges
- Medium duty - 7:1 compression ratio
- 12mm stroke
- Premium quality skeleton type body with built-in puncture tool

Resource Code: 6031499000

**Big Red Caulking Gun**
- Suitable for 900g cartridges
- Heavy duty - 12:1 compression ratio
- 7mm stroke
- Premium quality

Resource Code: 6033124016
Sausage Barrel Gun

- Suitable for all sausage packs up to 600ml
- Professional quality, superior grade plunger rod and barrel
- Heavy duty clutch - 12:1 compression ratio
- 7mm stroke
- Includes 1 nozzle

Resource Code: 6018714151

Sausage Gun Nozzle - 10 Pack

- Suitable for all adhesive/sealants
- Easy to trim
- Supplied in pack of 10pcs

Resource Code: 6006224059

Economy Foam Gun – Silver

- All metal applicator gun
- General purpose
- Compatible with Max Bond Pro Gun Adhesive, FulaFoam Pro Gun Applied Foam, FulaFoam Low Expansion Foam

Resource Code: 6035474365

FulaFoam™ Gun & Foam Cleaner - 500ml

- Does not contain CFC’s and H-CFC’s
- Rapidly removes uncured polyurethane
- Clean up of excess foam or foam adhesive from tools and work surfaces, window frames, window sills, doors, door jambs etc

Resource Code: 7319624021 (Ctn Qty: 12)
Correct: Sealant applied on backing rod using correct sealant dimensions

Incorrect: Sealant applied onto chamfered edge where concrete may be weak

Correct: Alternative method of installation preserves ability of sealant to expand and contract

Incorrect: Sealant extends too deep into joint leading to tearing away from sides or splitting

Correct: Sealant applied between two walls with backing rod to support movement

Incorrect: Sealant applied without backing rod or where excessive movement occurs, allows sealant to split away from the wall edges and tear
Surface Preparation & Priming

- Ensure substrate surfaces are clean, sound, dry and free of oil, grease, dust, loose particles, release agents, silicone and water repellents. Priming, or alternatively solvent wiping, is necessary for joints involving some substrates. Please refer to individual product technical data sheets.

Application Tips

- Care must be taken to select the correct sealant for the joint, taking into account requirements such as paintability, UV, temperature, chemical and water resistance, non-staining ability, joint movement capability, etc.
- Sealants should be applied between 5°C - 35°C ambient temperature.
- Sides of joints may be masked with tape prior to sealant application. If masking is undertaken, remove the tape before sealant cures.
- Wear appropriate clothing to avoid sealant contact with skin and eyes.
- Before sealant application, closed cell polyethylene or open cell polyurethane foam backing rod is usually pushed between the substrates to the joint depth, in order to control sealant depth forming the joint.
- In trafficable joints where firmer support is required, non-porous, semi-rigid backing rod type materials are sometimes recommended. Seek technical advice regarding the type of backing material and detailed instructions that need to be followed.
- Select a foam width where the foam will compress approx. 25% when pushed into the gap. Where closed cell foam is used, be careful not to puncture the surface, or over-compress the foam, as this can lead to gas from the foam bubbling into the sealant – a condition that worsens in warm conditions.
- In joints too shallow for backing rod, bond-breaker tape must be applied into the gap to avoid three-sided adhesion of the sealant, which will result in the joint failing.
- After applying sealant into the joint, the sealant should be smoothed (toolied), preferably without a release agent. If a tooling agent is required, check the technical data of the sealant to ensure suitability.
- Check the sealant technical data to ensure it is suitable for the proposed joint configuration.
- In standard expansion joints, the joint should be min 6mm width.
- For joints between 6mm and 10mm width, the depth of the sealant should be the same as the width (1:1).
- For joints between 10mm and 20mm width, the depth of the sealant should be 10mm.
- For joints between 20mm and 50mm width, the depth of the sealant should be half the joint width e.g. a 30mm width joint should have a depth of 15mm (1:2).
- Joints above 50mm are not standard, and technical advice should be sought.

Technical Data Sheets and Material Safety Data Sheets (referencing to product limitations) are available from our website: www.hbfuller.com.au

Calculating Yield

Yield depends on a number of factors including the gap width and depth and the shape of the bead. The tables (below) indicate nominal yield for a square joint for a 300ml cartridge or 600ml sausage.

Use the following formula to calculate yield in metres:

\[
\text{Yield (m)} = \frac{\text{Cartridge (300ml) or Sausage (600ml) Volume}}{\text{Gap Width (mm) x Depth (mm)}}
\]

Example:

\[
\text{Yield} \, 5\, \text{m} = \frac{300\, \text{ml Cartridge}}{8\, \text{mm W x 8\, mm D}}
\]
